PROFESSIONAL SUMMARY

Results-driven Software Engineer and B.Tech Computer Science student specializing in AI & ML at Sanskriti University (2023–2027). Demonstrates strong expertise in engineering fast, accessible, and responsive web applications using React, Next.js, TypeScript, and modern CSS frameworks, supported by rigorous foundations in data structures, algorithms (DSA), RESTful API integration, and applied machine learning (OpenCV, Scikit-Learn). Experienced in translating requirements into modular, scalable, user-centric software with clean code architecture.

EDUCATION

Sanskriti University — Mathura, Uttar Pradesh, India

Bachelor of Technology (B.Tech) - Computer Science & Engineering (AI & ML) — **2023 – 2027 (Expected)**

- Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming, Database Management Systems (DBMS), Web Technologies, Operating Systems, Machine Learning, Computer Vision, Deep Learning, Probability & Statistics.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend & Web: React.js, Next.js, Tailwind CSS, Responsive Web Design, Component Architecture, DOM APIs, State Management, Web Accessibility (WCAG)

AI / ML & Data: Computer Vision (OpenCV, Facial Landmark Tracking, EAR/MAR), Machine Learning, Scikit-Learn, Pandas, NumPy, Exploratory Data Analysis (EDA), Matplotlib

Developer Tools: Git, GitHub, RESTful APIs, Vite, Vercel, npm, VS Code, CI/CD Workflows, Linux/Bash

TECHNICAL PROJECTS

AI Driver Awareness System | *Python, OpenCV, Computer Vision, NumPy, Scikit-Learn* — GitHub Repository

- Engineered an edge-ready computer vision driver safety pipeline detecting fatigue, drowsiness, and distraction in real time.
- Implemented 68-point facial landmark tracking to calculate Eye Aspect Ratio (EAR) and head-pose orientation for millisecond alert triggers.
- Optimized frame preprocessing and mathematical thresholding to ensure 30+ FPS execution on standard webcams with low latency.

Geo Build Mart - Home & Construction Marketplace | *React, JavaScript, Tailwind CSS, REST APIs, Responsive Design* — Live Demo

- Architected a modern marketplace for home and construction needs to explore properties, building materials, home products, and services.
- Engineered a clean and responsive interface optimized for fast product discovery, intuitive category browsing, and streamlined customer enquiries.
- Delivered a simple, practical, and professional user experience with sub-second page transitions and mobile-first accessibility.

Student Performance Prediction System | *Python, Scikit-Learn, Pandas, NumPy, Matplotlib* — GitHub Repository

- Constructed an end-to-end predictive machine learning pipeline evaluating academic habits and attendance to identify early intervention needs.
- Conducted exploratory data analysis (EDA), data cleaning, feature normalization, and categorical encoding across multi-variate academic data.
- Benchmarked supervised regression and classification models using cross-validation and generated interpretable correlation plots.

Swagatam Vijay Bakers - Production Web App | *React, TypeScript, Tailwind CSS, Responsive Design, Vercel* — Live Demo

- Constructed an artisanal bakery web storefront featuring catalog navigation, dynamic cake category showcases, and order inquiry flows.
- Architected reusable, accessible UI component hierarchy optimized for smartphones, touchscreens, and cross-browser reliability.
- Deployed production application to Vercel with automated CI/CD branch builds and optimized asset delivery.

CERTIFICATIONS & SPECIALIZATIONS

- **Python Certification** — HackerRank — April 2024 | HR-PYTHON-2024
- **C Programming Certification** — HackerRank — April 2024 | HR-C-2024
- **Data Structures & Algorithms** — Infosys — October 2024 | INFOSYS-DSA-2024
- **Introduction to Artificial Intelligence** — Infosys — September 2024 | INFOSYS-AI-2024
- **IP Utsav** — AICTE — April 2025 | AICTE-IPUTSAV-2025
- **Spark Program** — Sanskriti University — March 2025 | SU-SPARK-2025
